PROFESSIONAL SUMMARY

Computer Science undergraduate (CGPA 8.81) with hands-on experience across the full stack — Java, Object-Oriented Programming, SQL, and front-end development — applied through two industry internships and end-to-end database-driven applications. Built Laundry and Courier Management Systems handling customer registration, order tracking, and billing through complete CRUD workflows. Delivered AI-powered workflow automation at VRNeXGen Technologies, integrating cloud services and optimising SQL/BigQuery queries to produce analytical reports for data-driven decision making. NPTEL Elite certified in Java and Python, with a record of competitive programming placements.

TECHNICAL SKILLS

Programming Languages: Java, Python

Web Technologies: HTML5, CSS3, JavaScript

Core CS: Object-Oriented Programming, Data Structures & Algorithms, Problem Solving, Database Management Systems, Software Development Life Cycle

Databases: MySQL, MongoDB, Google BigQuery

Developer Tools: Git, GitHub, Version Control, VS Code, Eclipse IDE

Automation: n8n Workflow Automation, AI Agent Orchestration

PROJECTS

Laundry Management System

Java, MySQL

- Replaced manual, paper-based order tracking with a database-driven application covering customer registration, billing, and delivery status.
- Engineered complete CRUD operations over MySQL, eliminating duplicate entries and giving staff real-time visibility into every active order.

Courier Management System

Java, MySQL

- Addressed the loss of consignment visibility in manual dispatch records by centralising shipment data in a relational database.
- Implemented consignment registration, status updates, and delivery tracking through structured CRUD operations, reducing lookup time for any shipment to a single query.

PROFESSIONAL EXPERIENCE

VRNeXGen Technologies — Software Development Intern Jun 2026 – Jul 2026 | Chennai, On-site

- Designed, developed, and deployed AI-powered automation workflows in n8n across both local and cloud environments.
- Integrated Gmail, Google Sheets, and other cloud applications to streamline recurring business processes end to end.
- Implemented AI agents for intelligent workflow orchestration and automated decision routing.
- Performed SQL-based data analysis in Google BigQuery Studio — natural language query generation, data retrieval, and query optimisation — delivering analytical reports that supported data-driven decisions.

CodTech IT Solutions — Java Programming Intern

Dec 2025 – Jan 2026 | Remote

- Completed a four-week Java Programming internship, building applications on core Java and Object-Oriented Programming principles.
- Applied file handling, exception handling, and OOP design to practical development tasks.

Dyizan Academy — Web Development Trainee

[Month YYYY – Month YYYY] | Remote

- Completed structured front-end training in HTML5 and CSS3, finishing with a 95% assessment score.

CERTIFICATIONS

- Programming in Java — NPTEL Elite
- The Joy of Computing using Python — NPTEL Elite
- MongoDB Basics for Students — MongoDB University
- Pearson MePro Level 5 — Professional English Proficiency

ACHIEVEMENTS

- Runner-Up — Code Jigsaw Competition, competitive programming contest.
- Runner-Up — AI Art Shadow Competition.

EDUCATION

Bachelor of Engineering (B.E.) — Computer Science and Engineering 2024 – 2028 (Expected)

Dhaanish Ahmed College of Engineering, Chennai | CGPA: 8.81 / 10
